- The combination of alpha-Arbutin from Bearberry Extract, glabridin from Licorice Extract work in synergy in this proprietary formula that delivers the active ingredients where they are the most effective.
- Safety-allergy tested
- Not tested on animals
- No parabens
- No phthalates
- Australian Made with Certified Organic Ingredients

How to Use

As a Spot Treatment (as required)

1. Cleanse the treatment area with Purify Cleanser Toner and wash the area with clean warm water.
2. Apply a small amount to the treatment area and gently massage in a small circular motion.
3. Leave treatment on the skin for 5 to 10 minutes
4. Remove completely with a damp face cloth.

As a Skin Brightening Treatment - Face or Body (once or twice per week)

1. Gently exfoliate the entire area with a mild exfoliant product
2. Wash area with clean warm water.
3. Apply fine layer of treatment to the treatment area and gently massage in a circular motion.
4. Leave the treatment on the area for approx 5 to 10 minutes
5. Remove completely either in a shower or by washing the area with clean warm water

Frequently Asked Questions

Is there any bleach in ILLUMINATE Skin Brightening Treatment?

No. We use botanical alternatives, such as alpha arbutin, sourced from organically grown bearberry leaf extract instead of harsh bleach to naturally brighten and inhibit the production of tyrosinase, an enzyme which leads to the overpigmentation of skin.

Key Ingredients

Bearberry Extract - Alpha Arbutin from Bearberry Extract inhibits production and activation of enzymes in the skin called tyrosinase - these enzymes cause skin pigmentation cells called Melanocytes to over produce brown pigment. By inhibiting tyrosinase, Alpha Arbutin reduces UV spots, melasma, pekas and prevents a reoccurrence of the excess pigmentation.

Licorice Root Extract - contains an active compound called "glabridin," which inhibits the tyrosinase that causes skin to darken in response to sun exposure. A natural skin whitening agent, glabridin helps decrease the production of melanin and rebalance skin cells.

Calendula - effective at soothing dry and irritated skin, it has antiseptic, anti-inflammatory properties

Kelp has cellular circulation properties, that help promote a break down and transport of excess pigmentation
